AI Toolkit - Speech Transcriber

Introduction

The **Speech Transcriber** tool is designed to convert spoken content from audio and video files into written text. It's ideal for transcribing meetings, lectures, and notes, enhancing accessibility, content creation, and language learning.

Key Features

- **Support Audio and Video files:** Compatible with both video and audio formats.
- **In-built Player Controls**: Preview the selected source file using the tool's built-in player.
- **Multiple Output Formats**: Convert speech to text or SRT format. The SRT format is useful for adding closed captions to videos. The default output is set to text.
- **Conversion History**: Access and download previously converted content at any time.
- **Download Options**: Download the transcribed content in text or SRT format from the conversation section.
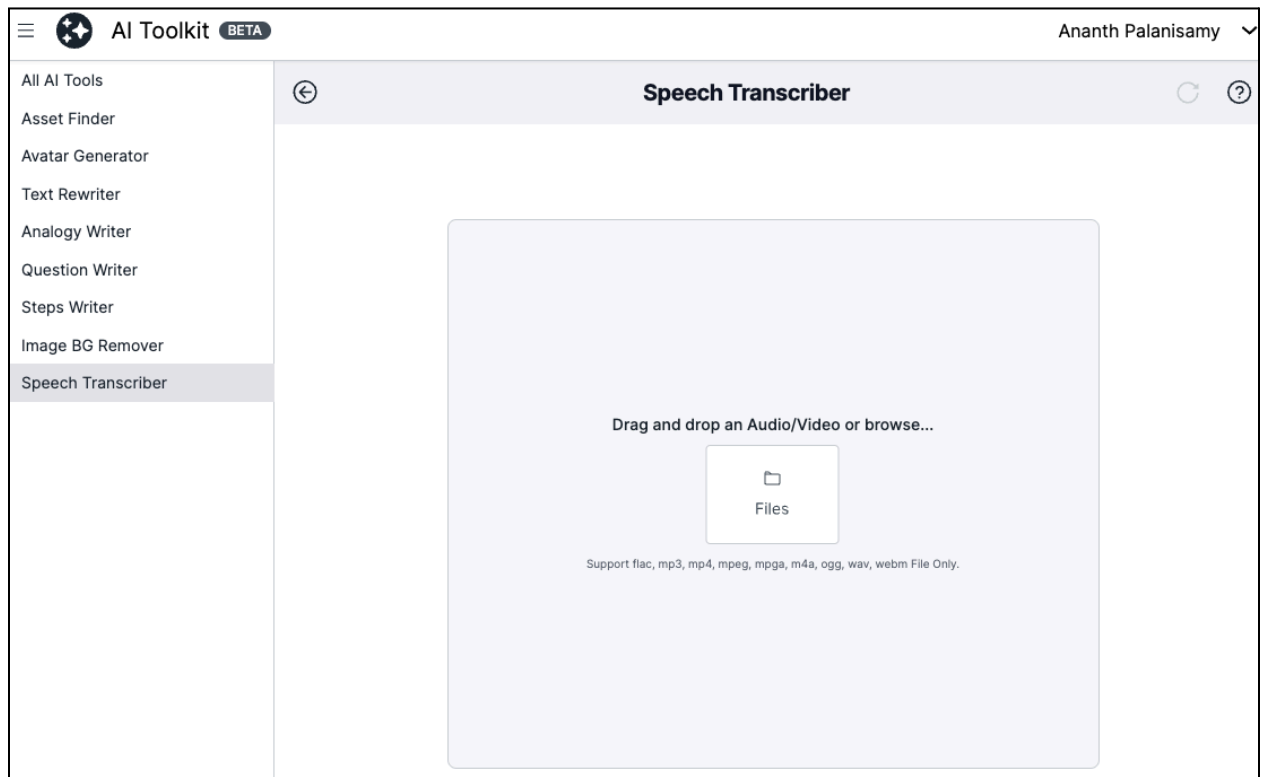

Supported Formats

| Type	Details
Input Formats	Support all leading Audio and Video formats including *flac, mp3, mp4, mpeg, mpga, m4a, ogg, wav, webm*.
Input limitation	Video Files: up to 100 MB Audio Files: up to 25 MB
Output format	Text or SRT (can be used fo closed caption)

How to Use the Tool?

Step 1: Select the Source File

- **Drag and Drop:** Drag the audio or video file into the designated area.
- **Browse:** Click the "Files" button to select a source file from your local storage.

Step 2: Preview and Choose Output Format

- The default output is set to text, but you can choose to transcribe it as an SRT file if needed.

Step 3: Transcribe the Source

- Click the "Speech Transcribe" button to start the conversion process. The tool will transcribe the content into the selected output format.

Hey, it's Aurelius. I hope you're doing well in this video. You're going to learn some top resources to download free stock videos for your next project, whether you post videos on YouTube, on social media, or even for commercial purposes. Let's start with the first one. This one's called Mixkit. Now, Mixkit is a great website owned by Envato Elements. And you can go and start searching for videos, such as something related to the sky. The first row of results that you see is usually an advertisement of other paid stock videos, of course, owned by Envato Elements. You can ignore it. Scroll down and let's say you...   **Show More**

Step 4: Reset or Download

- **Reset:** If you need to start over, click the "Reset" button to clear the current selection.
- **Download:** Click the "Download" button to save the Transformed Text in TXT format to your local machine.

Troubleshooting

If you encounter errors during the conversion, try the following:

- **Check File Format**: Ensure your file is in a supported format.
- **File Size Limits**: Make sure your video file does not exceed 100 MB and your audio file does not exceed 25 MB.
