Release Notes

Simplify Enrollment, Cancel RSVP, and Publish from Lectora Online

January 10, 2022

New Features

- **[Enrollment Due Dates](#).** Administrators can now set due dates for module and course enrollment. Due dates can be a specific day or a relative day based on when the user was enrolled in the course/module. Administrators can also set automated "due soon" and "past due" reminders for learners.
- **[Auto-Recurring Enrollments](#).** For modules and courses that need to be taken periodically, administrators can now set up automatic recurring enrollments. Administrators can view enrollment completion based on each enrollment period.
- **[Lectora Online One-Click Publish](#).** Course developers can now publish directly from Lectora Online to the Rockstar Learning Platform.
- **["All" Learner Group](#).** Users, modules, and channels will now be automatically assigned to the "All" learner group. Administrators can toggle this new feature off, and users, modules, and Channels can be removed from the "All" learner group. This feature will be toggled off by default for existing accounts and must be toggled on if this new feature is desired.

Feature Enhancements

- **Preview Modules.** Modules (video, audio, SCORM, PDF, link, and YouTube) can be previewed in the My Library and Subscription tabs with the new "Preview" button.
- **"Expired" Module Status:** Modules that have expired will now display they are "expired" rather than "not published".
- **Cancel RSVP:** [Admins](#) can now cancel users' RSVP's for event modules and [users](#) can cancel their own RSVP's.
- **User Status Field:** A user status field has been added to the [module completion report](#).

- **SCORM Launch in New Window:** The usability of SCORM files that are launched in a new window has been improved.

Bug Fixes

- The SCORM 2004 Data Model has been updated
- The "Open in a New Window" feature has been improved for Bizlibrary, Articulate Rise, and other SCORM modules
- Loading time has been improved and continuous loading errors have been resolved
- An issue with duplicate microlearning modules on creation has been fixed
- Improved search capabilities
- All enterprise strings now display in the settings dropdown
- The "Library has expired" error message has been removed
- Users are no longer logged out when selecting enrolled modules
- The "Enroll others" button now reliablly selects the correct module
- The import users list can now include both new and existing users; existing users will not have a new account created
- Blank spaces can no longer be added to the end of users' emails on the "Enrollment" tab
- Enrollment emails now automatically log users in when they select the "start" button
- Report exporting capabilities and display have been improved
- Button display and other display issues with module pages and thumbnails have been resolved
- Prerequisite navigation has been repaired
- The display and functionality of the micorlearning module builder's camera feature, CenarioVR modules, and other features has been improved
- Module pages now consistently display the "Add to saved", "Rating", and "Add to board" buttons
- SCORM module scoring no longer displays "NAN"
- "Session" has been replaced with "Module" on the "Enroll" popup window and on the "Status completion" popup
- The "Exit" button on modules that have opened in a new tab now works reliably

RLP 1.5.11 Maintenance
November 21, 2021

Bug Fixes

- RSVP button is now disabled for Prerequisites
- Microlearning Modules are no longer duplicating when first created
- Users can no longer edit virtual copies of microlearning modules and games

- Making a virtual copy of a module only creates one copy entry
- Enrollment completion data for historic records have been updated
- Problems with launching VADO SCORM modules have been resolved
- Broken Images in CVR modules have been repaired

Enrollment Feature Enhancements and Usability Improvements

September 09, 2021

Feature Enhancements
- **[Unenroll learners](#).** Administrators can now unenroll learners who self-enrolled in courses or modules or learners that were enrolled by administrators.
- **Hide the *Unenroll* button for specific courses.** The *Unenroll* button that is displayed on course tiles on the learner dashboard, course pages, and module pages can now be hidden by setting *Allow Users to Unenroll* to *No* when editing a course from the administrative *Content* page.
- **Batch enroll up to 999 learners at once.** Administrators are now able to batch enroll up to 999 users at the same time (previous limit was 100).
- **Launch SCORM in it's own window.** Administrators are now able to specify with an on/off toggle if a SCORM module will launch in its own window (as opposed to opening on the course page).

Usability Improvements
- ***Session* has been renamed to *Module*.** This change addresses a common point of confusion for new users of the platform, and is in line with standard terminology used when referring to units of instructional content.
- ***Media Group* has been renamed to *Learner Group*.** This change more accurately reflects how these tags are used for assigning content to specific groups of learners.

Build out Microlearning Modules & Add Games—No Separate Authoring Tool Needed!

July 21, 2021

New Features

- **Create microlearning modules using the new built-in rapid authoring tool.** Add microlearning modules (with text, images, videos, and more) to your reusable content library—no separate authoring tool required!
- **Insert games and arcades from The Training Arcade™.** Connect your account from The Training Arcade™ to easily add games and arcades into your reusable content library in the Rockstar Learning Platform. Then add them to courses, microlearning modules, and channels.

Feature Enhancements

- **View all enrolled users.** Administrators are now able to view all learners enrolled in a course, including those who self-enrolled or were enrolled by another administrator.

Bug Fixes

- Results display issue with the *Interactive > Users* report

---

Create and Subscribe to Content Libraries - All with a Faster Load Time

April 30,2021

New Features:

- Content providers on the Rockstar Learning Platform can now be enabled as **Publishers**. Publishers can create libraries of content to share with other Rockstar Learning Platform customers.
- **Subscribers** will be able to access published content from the *Subscriptions* tab on their admin *Content* page and can blend subscription content into their courses and channels.

Feature Enhancements:

- Improved **usability of the following reports**:
  - *User: User Details*
  - *Interactive: Module*
  - *Interactive: User*
  - *Events: Module*
  - *Events: User*
  - *Activity: Module*
  - *Activity: User*

Data for these reports is available at a glance now; there is no need to search in order to see results.

Usability Improvements:

- Course page load time has been significantly reduced

Seeing Your Content Contributions Just got Easier

April 22, 2021

Feature Enhancements:

- User contributed content is listed under **Contributions tab** instead of My Library

---

Create Learning Paths Based on Learners' Interests - Plus SAML and an Improved Video Interface
